GadTrack brings together the flexibility, features, and affordability of the Gadget-Spot cameras, with the second to none features of GadWatch, and enhances this pairing by automating the capability of the Pan and Tilt cameras in the range.

As the proud owner of a Pan and Tilt camera you might have often wanted it to automatically follow moving objects. Although there are cameras, providing this feature, you might not be willing to spend large sums of money for a camera, which auto follow options are not able to change, or you already own a number of cameras, which you want to enable to automatically follow objects.

GadTrack will enable your cameras with pan and tilt capability to track moving objects. You can choose from different brands of cameras, or use preset cameras in the GadTrack installation.

Your camera will automatically follow moving objects, like intruders, trespassers or animals.

[GadTrack PTZ tracking software for GadWatch](#) - Price: £65.00

- Keep an eye on your home, place of business, cars, and valuables. Watch your pets and your kids. Monitor your nanny, babysitter, or employees.
